Research interests

Stochastic networks, rare events analysis, network optimization, operations research, reinforcement learning, power systems resilience, extreme weather events.

My research is centered around the study of complex networked systems in which randomness plays a crucial role. More specifically, I study **dynamics and rare events in networks affected by uncertainty**, drawing motivation from real-world applications in power systems. My work lies mostly in the area of applied probability but has deep ramifications in areas as diverse as operations research, graph theory, and optimization.

My long-term goal as a researcher is twofold. First, I aim to quantify and analyze the randomness emerging in these complex systems using both **rigorous mathematical tools** and **data-driven learning methods**. Second, I plan to develop adaptive algorithms and reinforcement learning control strategies to mitigate the impact of high-impact, low-probability events and enhance network robustness.

As the **climate crisis** exacerbates the frequency and severity of extreme weather events, my research aims to develop a novel and rigorous mathematical understanding of **power systems resilience** against such phenomena, which naturally exhibit pronounced spatial and temporal correlations.

More broadly, I am interested in stochastic dynamics on networks, especially when a non-trivial interplay emerges between the network structure and the system's randomness, a setting where **applied probability**, **learning**, and **optimization** naturally meet.

Academic Employment

Oct 2019 – present	**Vrije Universiteit Amsterdam**, Amsterdam *Department of Mathematics* Tenured assistant professor (UD1)
Mar 2021 – present	**Centrum Wiskunde & Informatica (CWI)**, Amsterdam Affiliate Researcher
Sep 2017 – Sep 2019	**California Institute of Technology**, Pasadena, CA *Computing and Mathematical Sciences Department* Postdoctoral scholar Mentors: Prof. Adam Wierman and Prof. Steven Low
Dec 2017 – Sep 2019	**Resnick Sustainability Institute**, Pasadena, CA Affiliate postdoctoral fellow
Jan 2016 – Aug 2017	**Centrum Wiskunde & Informatica (CWI)**, Amsterdam Postdoctoral scholar Mentor: Prof. Bert Zwart

Education

Sep 2011 – Dec 2015	**Eindhoven University of Technology**, The Netherlands PhD in *Mathematics* Thesis: Spatio-temporal dynamics of random-access networks: An interacting particle approach Advisors: Prof. Sem Borst, Prof. Johan van Leeuwaarden, Prof. Francesca Nardi
2012 – 2013	Diploma (grade 9.0/10) by the **LNMB** (*Dutch Network for the Mathematics of Operations Research*)
2010 – 2011	**University of Cambridge**, United Kingdom Master of Advanced Studies (Part III) in *Mathematics*, **with merit** Essay: Random spanning trees Assessor: Prof. Geoffrey Grimmett
2007 – 2010	**Università degli Studi di Padova**, Italy Bachelor in *Mathematics*, **110/110 cum laude** *(with honors)* Thesis: Random Fragmentation Chains Supervisor: Prof. Paolo Dai Pra

Awards and grants

2025 **NWO Vidi grant** (€ 850.000, 5 years of funding)
Project: *"Power Network Optimization in the Age of Climate Extremes"*

Vidi is a prestigious funding program for experienced researchers of the NWO (Netherlands Organization for Scientific Research) to support groundbreaking and high-impact projects.

2017 **NWO Rubicon grant** (€ 135.000, 2 years of postdoc funding, ref. # 680.50.1529)
Project: *"Renewables and uncertainty in future power systems: Mathematical challenges and solutions"*

Rubicon is a highly competitive grant open for all scientific disciplines awarded by the NWO (Netherlands Organization for Scientific Research), which gives talented young researchers the chance to gain postdoctoral experience at a top research institution abroad.

2015 **Applied Probability Trust award** for the best PhD thesis in applied probability

Travel grants
2020, 2021 STAR Visitor grant (co-applicant)
2019 Isaac Newton Institute CPS bursary (recipient) for the thematic semester *"The mathematics of energy systems"* in Cambridge, UK
2018, 2016, 2012 Stochastic Networks conferences travel grants (recipient)
2013 Performance conference travel grants (recipient)

Professional memberships

IEEE, INFORMS and Applied Probability Society, ACM and Sigmetrics, LNMB

Certifications

Oct 2021 **University Teaching Qualification (UTQ)** recognized by Dutch universities

Sep 2019 Italian **National Scientific Habilitation** (ASN) as Associate Professor (sector 01/A3 - Analysis, Probability Theory and Statistics - MAT/06)
