Research profile

I study dynamics, optimization, and rare events in complex networked systems under uncertainty. My work combines applied probability, stochastic and combinatorial optimization, graph theory, and data-driven learning, with a particular focus on power grids and specifically transmission networks. Current research investigates how spatially and temporally correlated extreme weather can trigger failures and cascades, and how adaptive topology control, reserve procurement, and reinforcement learning can improve power-system resilience. I also work on stochastic network design, Markov-chain optimization, uncertainty-aware ship design, interacting particle systems, and opinion dynamics.

Research interests: stochastic modeling for power grids; weather-driven grid risk; rare-event simulation; stochastic network optimization; reinforcement learning for grid control; operational transmission-topology planning; uncertainty-aware network design and optimization.

Selected achievements

- Principal Investigator of the **NWO Vidi project** *Power Network Optimization in the Age of Climate Extremes* (2025–2030; €850,000).
- Co-author of the Cambridge University Press textbook *Hands-On Mathematical Optimization with Python* (2025).
- Recipient of an **NWO Rubicon grant** for postdoctoral research at Caltech (2017–2019; €135,000).
- Co-supervisor of four current doctoral researchers across VU Amsterdam and CWI.
- Program Director for the BSc program in Business Analytics at VU Amsterdam (2026–present).

Academic appointments and affiliations

Oct 2019–present	Vrije Universiteit Amsterdam , Amsterdam Tenured Assistant Professor, Department of Mathematics (Dutch rank: UD1)
Mar 2021–present	Centrum Wiskunde & Informatica (CWI) , Amsterdam Affiliate Researcher (secondary affiliation)
Sep 2017–Sep 2019	California Institute of Technology , Pasadena, CA Postdoctoral Scholar, Computing and Mathematical Sciences; Affiliate Postdoctoral Fellow, Resnick Sustainability Institute (Dec 2017–Sep 2019). Mentors: Prof. Adam Wierman and Prof. Steven Low.
Jan 2016–Aug 2017	Centrum Wiskunde & Informatica (CWI) , Amsterdam Postdoctoral Scholar. Mentor: Prof. Bert Zwart.

Education and qualifications

- 2011–2015 **Eindhoven University of Technology**, The Netherlands
PhD in Mathematics. Thesis: *Spatio-temporal dynamics of random-access networks: An interacting particle approach*. Advisors: Prof. Sem Borst, Prof. Johan van Leeuwen, and Prof. Francesca Nardi.
- 2012–2013 **Dutch Network for the Mathematics of Operations Research (LNMB)**
Postgraduate diploma in operations research (grade 9.0/10).
- 2010–2011 **University of Cambridge**, United Kingdom
MASt (Part III) in Mathematics, with merit. Essay: *Random spanning trees*. Assessor: Prof. Geoffrey Grimmett.
- 2007–2010 **Università degli Studi di Padova**, Italy
BSc in Mathematics, 110/110 cum laude (with honors). Thesis: *Random fragmentation chains*. Supervisor: Prof. Paolo Dai Pra.

Qualifications

- Oct 2021 **University Teaching Qualification (UTQ)**, recognized by Dutch universities.
- Sep 2019 **Italian National Scientific Habilitation (ASN)** as Associate Professor, sector 01/A3 – Analysis, Probability Theory and Statistics (MAT/06).

Grants and awards

- 2025–2030 **Dutch Research Council (NWO), Vidi grant** – Principal Investigator; personal award, €850,000; five years. Project: *Power Network Optimization in the Age of Climate Extremes*.
- 2017–2019 **Dutch Research Council (NWO), Rubicon grant** – recipient; personal mobility award, €135,000; two years; ref. 680.50.1529. Project: *Renewables and uncertainty in future power systems: Mathematical challenges and solutions*.
- 2015 **Applied Probability Trust Award** for the best PhD thesis in applied probability.

Travel and visitor support: STAR visitor grant (co-applicant, 2020 and 2021); Isaac Newton Institute CPS bursary (recipient, 2019); Stochastic Networks conference travel grants (2012, 2016, and 2018); IFIP Performance conference travel grant (2013).

Professional memberships: IEEE; INFORMS; INFORMS Applied Probability Society; ACM; ACM SIGMETRICS.

Publications

The complete record is grouped by output type and reverse chronological within each group (preprints, journal articles, and conference publications). See also [Google Scholar](#).

Research team and supervision

Current doctoral researchers

- 2025–present **Robbert van der Burg**, VU Amsterdam. Project: *Modeling weather-driven failures in power grids.*
- 2025–present **David Krame Kadurha**, VU Amsterdam. Project: *Optimizing Weather-Resilient Grid Operations.*
- 2022–present **Berend Markhorst**, VU Amsterdam. Project: *Robust, effective and adaptable ship design.*
- 2021–present **Erica van der Sar**, VU Amsterdam. Project: *Multi-agent reinforcement learning for power-system topology control.*

Completed doctoral researchers

- 2023–2025 **Jöbke Janssen**, CWI – co-supervisor. Project: *Stochastic optimization of frequency reserve markets.*
- 2017–2022 **Chen Liang**, Caltech – co-supervisor. Project: *Cascading failures in power systems: Control and mitigation algorithms.*
- 2017–2019 **Linqi Guo**, Caltech – co-supervisor. Thesis: *Impact of transmission network topology on electrical power systems.*
- 2016–2020 **Tommaso Nesti**, CWI – co-supervisor. Thesis: *Stochastic analysis of energy networks.*

Master's thesis supervision

- 2026 – *Blending Optimization of Networks with Uncertain Scenarios (BONUS): An application to hydrogen blending in natural gas networks* (L. Beemster, VU).
- 2026 – *A Stochastic Optimization Model for Mobile Stroke Unit Deployment* (R. van Anandel, VU).
- 2026 – *How Effective is Battery Storage for Congestion Management in Dutch Low-Voltage Networks?* (T. Bredée, VU).
- 2025 – *From TULIP to LOTUS: A framework for warm-starting dual decomposition in two-stage stochastic programming via scenario reduction* (E. Cornielje, VU).
- 2025 – *MILP for wind-BESS co-location in continuous intraday markets* (J. de Groot, VU).
- 2025 – *Automating and optimizing cluster-based time-window assignment for e-grocery deliveries* (S. de Wilde, VU).
- 2025 – *A data-driven approach to optimizing central warehouse location in the U.S.* (F. Hoost, VU).
- 2024 – *Defining responsibility areas in MARL for power-network control* (A.G. Alamo, VU).
- 2024 – *Strategic supply-chain planning under uncertainty* (L. Kreukniet, VU).
- 2023 – *Planning under uncertainty: Strategic decision-making in supply-chain networks* (F. Hathorn, VU).
- 2023 – *Integration of maintenance and routing optimization* (N. Malbasic, VU).
- 2023 – *Online stock-allocation strategies: An explorative study of the alternating shipment landscape* (R. Dijkstra, VU).
- 2023 – *A green supply chain for repairable items at KLM Cargo* (D. Otto, VU).
- 2022 – *Generation of synthetic power grids using exponential random graph models* (F. Giacomarra, VU).
- 2021 – *Spectral clustering and combinatorial optimization for power-network reliability* (L. Lan, VU).

Research software and open educational resources

- **MO-book companion** – open notebooks, mathematical models, and code supporting *Hands-On Mathematical Optimization with Python*; co-authored with K. Postek, J. Gromicho, and J. Kantor.
- **Dynamic FCR Nordic repository** – code and data supporting the paper *Dynamic dimensioning of frequency containment reserves: The case of the Nordic grid.*
- **Skipping-sampler companion code** – Jupyter notebooks supporting the paper *A Metropolis-class sampler for targets with non-convex support.*

Teaching and academic leadership

Lecturer, Vrije Universiteit Amsterdam:

- *Mathematical Foundations of Machine Learning* (MSc, 2026–present).
- *Mathematical Optimization* (MSc, 2019–present).
- *Probability Theory* (BSc, 2022–2026).
- *Project Big Data* (BSc, 2020–present).
- *Capstone Project in Data Science* (BSc minor, 2026–present).
- *Business Analytics Research Seminar* (MSc, 2019–present).
- *Statistical Methods* (BSc, 2021).

Academic leadership:

- Program Director, BSc Business Analytics (2026–present).
- Chair, Department of Mathematics outreach committee (2021–2025).
- Member, Business Analytics internship committee (2019–2026).
- Partner member, Amsterdam Data Science initiative (2022–present).

Editorial, organizational, and professional service

Editorial service: Associate Editor, *Performance Evaluation* (2021–present).

Research and conference organization:

- Co-organizer, [CWI research semester *Analytic Foundations of the Future Power Grid*](#) (2027).
- Publicity Chair, IFIP Performance Conference (2025).
- Co-organizer, [workshop in memory of Francesca Romana Nardi](#) (2022).
- EURANDOM ambassador for Queueing and Performance Analysis (2021–present).
- Co-organizer, Young European Queueing Theorists workshop [Winter School on Energy Systems](#) (2017).

Professional service:

- Member, NWO Open Competition ENW-M assessment committee (2026–present).
- Reviewer for journals including *Operations Research*, *Mathematics of Operations Research*, *Stochastic Systems*, *INFORMS Journal on Computing*, *IEEE Transactions on Power Systems*, *IEEE Transactions on Automatic Control*, *Journal of Applied Probability*, and *Performance Evaluation*.
- Program-committee or reviewer service for IFIP Performance, ACM e-Energy, ACM SIGMETRICS, IEEE CDC, PSCC, SODA, PMAPS, and VALUETOOLS.

Public and educational engagement:

- Initiator, *Welcome Program for New Employees*, Department of Mathematics, VU Amsterdam (2020).
- Mathematics Olympiad trainer: Italy (2007–2010) and the Netherlands (2022–2025).

Selected talks and seminars

Feb 2026	Champéry Power Conference, Champéry. Talk: <i>From Static to Smart: Rethinking Grid Stability with Dynamic Reserves</i> .
Apr 2025	Probability & Statistics Seminar, TU Delft.
Feb 2025	Reinforcement Learning & Energy Workshop, Leiden.
Oct 2024	INFORMS Annual Meeting, Seattle.
Mar 2024	Leiden Complex Networks Network seminar, Leiden.

Invited research visits

- 2016, 2020, 2021 California Institute of Technology, Pasadena (host: Prof. Adam Wierman).
 Jan 2019 Isaac Newton Institute thematic semester *The Mathematics of Energy Systems*, Cambridge, UK.
 Sep 2018 DISMA, Politecnico di Torino (hosts: Prof. Fabio Fagnani and Prof. Giacomo Como).
 Sep 2017 Università degli Studi di Firenze (host: Prof. Francesca Nardi).
 Dec 2016 LAMA, Université Paris Est Créteil (host: Prof. Florian Sohler).
 Nov 2015 Universitat Pompeu Fabra, Barcelona (host: Prof. Boris Bellalta).
 Jul 2014 EPFL, Lausanne (host: Prof. Patrick Thiran).
 May 2014 Hamilton Institute, Dublin (hosts: Prof. Douglas Leith and Prof. Ken Duffy).

Earlier talks, seminars, and presentations

The following appendix preserves the historical presentation record, see earlier section for recent invited activity.

- 2023 PGMO Days, Paris; INFORMS Applied Probability Society Conference, Nancy; SIAM Conference on Computational Science and Engineering, Amsterdam.
 2022 Workshop for Francesca Romana Nardi, Florence; 3rd Italian Meeting on Probability and Mathematical Statistics, Bologna; Digital Energy Seminar, CWI.
 2021 INFORMS Annual Meeting; two-part RSRG seminar, Caltech; KdVI Mathematics Colloquium, University of Amsterdam.
 2020 SPOR Seminar, TU Eindhoven; Mathematics Seminar, Università degli Studi di Padova; Probability and Statistics Seminar, TU Delft.
 2019 Conference on Monte Carlo Methods and Applications, Sydney; INFORMS Applied Probability Society Conference, Brisbane; Resnick Fellows Seminar Day, Pasadena; *Reliability and Resiliency in Network Infrastructure* workshop, Santiago; CUED Control Group Seminar, Cambridge.
 2018 IFIP Performance Conference, Toulouse; Young European Queueing Theorists workshop, Toulouse; INFORMS Annual Meeting, Phoenix; CMI Seminar, Caltech; DISMA Seminar, Politecnico di Torino; Simons Institute seminar, Berkeley.
 2017 Opening conference VPSMS 2018, Verona; INFORMS Annual Meeting, Houston; CMS Seminar, Caltech; INFORMS Applied Probability Society Conference, Evanston; 1st Italian Meeting on Probability and Mathematical Statistics, Torino; CWI *Future Energy Systems* workshop, Amsterdam; IMA and OR Society Conference on Mathematics of OR, Birmingham.
 2016 Université Paris Est Créteil seminar, Paris; *Metastability in Statistical Mechanics and Stochastic Processes* workshop, EURANDOM.
 2015 Università degli Studi di Padova seminar; INFORMS Applied Probability Society Conference, Istanbul; Mathematical Institute seminar, Leiden University.
 2014 Berlin-Padova Young Researchers Meeting; EPFL seminar, Lausanne; Hamilton Institute seminar, Dublin.
 2013 IFIP Performance Conference, Vienna; INFORMS Applied Probability Society Conference, San José.
 2012 6th International VALUETOOLS Conference, Cargèse.

Contributed presentations and posters

- Jun 2018 Poster, Stochastic Networks Conference, Edinburgh.
 Jun 2018 Poster, ACM SIGMETRICS Conference, Irvine.
